

# Sequim Address Grid Boundary

The address grid is bounded on the north by Old Olympic Hwy and Port Williams Road. The western boundary follows Kendall Road to Hendrickson Road to Priest Road to West Washington St. to River Road to the Hwy 101 bypass route to 7th Ave and south to Happy Valley Rd. It is bounded on the South by Happy Valley Rd. The eastern boundary follows south along Brown Rd to the north section line of Section 20, to the section corner, and south along Blake and Still Roads and section lines to the Hwy 101 bypass to Sequim Ave. and south along Sequim Ave and the section line to Happy Valley Road.

Old Olympic Highway, River Rd., and Happy Valley Rd. addresses all use the rural (Clallam County) system. Addresses on all other roads acting as address grid boundaries use the City system. Addresses on Hendrickson Rd. west of Priest Rd. use the rural system with a false origin based on the map distance from Sequim Ave. Addresses on either side of the grid boundary on N. Sequim Ave and Sequim Dungeness Way were adjusted to create a smooth transition between blocks and mileage based addresses. All those portions of old SR 101 not included in the bypass route were addressed as grid addresses on Washington Street. These extensions do not apply to any other roads.
